

# AN ENDLESS SUMMER

TRESPA®

HIGH PRESSURE LAMINATES  
from NETHERLANDS

Lumen: White

Think spectacular scenery: from lush, summery Tuscany to the gold, sandy beaches of Pondicherry! The mottled shades of TRESPA inspire new designs and endless ideas.

TRESPA high-pressure laminates are made with up to 70% natural fibers from sustainably sourced wood, while the surface is composed of 30% environmentally friendly pigments and thermosetting phenolic resins.

## GOODBYE OVERHEATING!

Unicolour: Sienna Brown, Dark Denim & Milano Sabbia

The phenolic panels endure 3,000 hours of artificial aging which is equivalent to 10 years of real-time weathering!

The laminates are exposed to Florida's harsh climatic conditions and undergo severe performance and quality assurance tests.

Lumen: White

TRESPA installation functions as a ventilated façade system, which aids in insulation. The air cavity formed due to the TRESPA panels and the outer wall provides continuous airflow, mitigating heat and moisture.

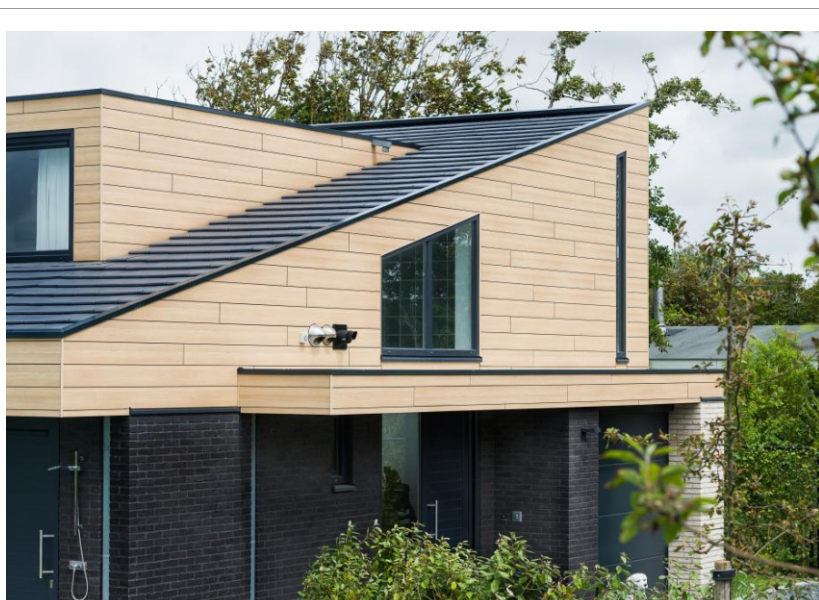

Wood Decor: Halmstad

Cleaning of TRESPA panels

TRESPA LUMEN- Let's play!

Wood Decor: Classic Oak
